

# Contents

Preface	
1. History of nonwovens in Japan .....	6
2. Definition of nonwovens .....	9
3. Raw fibers .....	12
3. 1 Natural fibers .....	14
(1) Cotton .....	14
(2) Silk .....	15
(3) Sheep wool .....	15
(4) Bast fibers .....	15
(5) Pulp .....	15
(6) Mineral fibers .....	15
3. 2 Chemical fibers .....	16
a) Wet spinning .....	16
b) Dry spinning .....	17
c) Melt spinning .....	17
3. 2. 1 Regenerated fibers .....	17
(1) Rayon, Polynosic .....	17
(2) Cupra .....	17
(3) Solvent spinning fiber .....	18
3. 2. 2 Semi-synthetic fibers .....	18
(1) Acetate .....	18
(2) Promix .....	18
3. 2. 3 Synthetic fibers .....	18
(1) Nylon .....	18
(2) Polyester .....	19
(3) Polypropylene .....	19
(4) Acrylic fiber .....	19
(5) Vinylon .....	19
(6) High-function fibers .....	19
(7) Polylactic acid fiber .....	22
(8) Modified cross-section fibers .....	22
3. 2. 4 Inorganic fibers .....	22
(1) Glass fiber .....	22
(2) Carbon fiber .....	22
(3) Metal fiber .....	22

4. Adhesives (binders), finishing auxiliaries .....	26
4. 1 Adhesives .....	26
(1) Classification by form .....	26
(2) Classification, merits, and demerits of liquid adhesives .....	26
(3) Classification of liquid adhesives, typical resins, and main applications .....	27
(4) Classification of solid adhesives .....	27
(5) Typical resins and main applications of solid adhesives .....	27
(6) Loading amount of adhesive and its effects on nonwovens .....	28
4. 2 Finishing auxiliaries .....	28
(1) Processing additives .....	28
(2) High-function agents .....	28
5. Manufacturing methods .....	30
5. 1 Outline .....	30
5. 2 Web forming methods .....	30
5. 2. 1 Wet-laying process .....	32
a) Features of wet-laying process as compared with dry-laying .....	33
b) Typical web forming types .....	33
c) Typical drying methods .....	34
5. 2. 2 Air-laying process .....	35
a) What is air laying? .....	35
b) Nonwovens by air-laying and main applications .....	35
c) Features of air-laid nonwovens .....	35
d) Fiber-bonding method for air laying .....	35
e) Establishment of air-laying methods in japan .....	36
f) Comparison of dry web forming by three major air-laying methods .....	37
g) Application of air-laying technology .....	38
5. 2. 3 Dry-laying process .....	39
a) Mixing of fibers .....	39
b) Web forming .....	39
c) Fiber bonding/adhering .....	42
5. 2. 4 Spunbonding method .....	43
a) Raw materials .....	43
b) Web forming .....	44
c) Fiber bonding .....	46
5. 2. 5 Meltblowing method .....	47
5. 2. 6 Flash spinning method .....	48
5. 2. 7 Tow opening method .....	49
5. 2. 8 Film drawing method .....	50
a) Burst fiber method .....	50

b) Film split method .....	50
5. 2. 9 Electro-spinning method .....	54
5. 3 Adhering / bonding of interfibers .....	56
5. 3. 1 Chemical-bonding .....	56
5. 3. 2 Thermal-bonding .....	57
5. 3. 3 Needle-punching .....	58
5. 3. 4 Hydroentangling (Spunlacing) .....	60
5. 3. 5 Stitch-bonding .....	61
5. 3. 6 Powder-bonding .....	61
5. 3. 7 Solvent-bonding .....	61
6. Applications of nonwovens .....	64
6. 1 Clothing .....	64
6. 2 Protective wear .....	65
6. 3 Medical care .....	66
6. 4 Architecture .....	69
6. 5 Civil engineering .....	71
6. 6 Vehicle .....	73
6. 7 Hygiene materials .....	75
6. 8 Furniture and interior goods .....	77
6. 9 Wipes .....	78
6. 10 Filter media .....	78
6. 11 Bedding .....	81
6. 12 Agriculture, horticulture .....	81
6. 13 Leather .....	83
6. 14 Other household miscellaneous goods .....	83
6. 15 Other industrial applications .....	86
7. Test methods .....	90
7. 1 JIS nonwoven test methods .....	90
7. 2 JIS test methods related to nonwovens .....	92
7. 3 ISO standards .....	94
